### Profile Summary

Experienced Full-Stack Developer with expertise in Angular, React.js, and Node.js for building scalable web applications. Skilled in RESTful API development, JWT authentication, and MySQL database integration. Proficient in Python and Flask for backend scripting and automation. Hands-on experience with AWS EC2 deployment, LDAP authentication, and security measures to protect applications from vulnerabilities like XSS and CSRF. Strong background in cron jobs, Redis for email services, and version control using Git/Bitbucket.

### Work Experience

#### Full Stack Web Developer

Accenture

10/2021 - Present

- Developed and maintained web applications using **Angular** and **React.js**, ensuring high performance and scalability.
- Built and optimized Node.js backend services using Express, handling authentication, authorization, and API integrations.
- Implemented JWT-based authentication, ensuring secure access control for web applications.
- Worked on Server-Side Rendering (SSR) in Angular, improving SEO and initial page load speed.
- Designed and integrated RESTful APIs with MySQL databases and mongodb, optimizing queries for performance.
- Developed Python scripts for email automation, executed via Node.js child processes to ensure smooth backend operations.
- Built and deployed Flask-based APIs, enabling efficient backend communication and data processing.

- Created and scheduled cron jobs for automated tasks like email notifications.
- Integrated LDAP authentication for user login and role-based access control.
- Deployed applications on AWS EC2 and configured domains for hosting multiple applications on a single server.
- Implemented security measures against XSS, CSRF, and other web vulnerabilities to protect applications.
- Utilized Redis for email services and Bitbucket/Git for version control and CI/CD pipelines

## Education

 **B.Tech/B.E. - Computers**

2021

MLR Institute of Technology, Hyderabad

Grade - 7.9/10
