Profile Summary

I am a versatile Full-Stack Developer with over 3+ years of experience in creating scalable web applications. Proficient in Angular, React.js, Node.js, Python, and AWS, I excel in building responsive front-end interfaces, robust back-end architectures, and efficient database solutions using MySQL. Skilled in developing REST APIs, caching with Redis, and automating workflows with cron jobs, I have successfully managed multiple applications simultaneously.

I have expertise in implementing secure authentication systems, including JWT, ensuring data integrity and user privacy. Proficient with version control tools like Git and Bitbucket, I deliver clean, maintainable, and optimized code for collaborative environments. With a problem-solving approach and attention to detail, I focus on delivering innovative, end-to-end solutions that enhance user experiences and meet business goals.

Work Experience

Full Stack Web Developer
Accenture
10/2021 - Present

Accenture
Software Engineer (Full-Stack Developer)
Duration: [October 2021 — Present]

- Developed scalable web applications using **Angular**, **React.js**, and **Node.js**, delivering user-friendly interfaces and robust back-end systems.
- Collaborated in Agile teams to manage multiple projects simultaneously, ensuring timely delivery of high-quality solutions.
- Built and optimized REST APIs to enable seamless client-server communication, ensuring security and performance.

- Integrated MySQL databases for efficient data storage and retrieval, designing schemas and writing optimized queries.
- Implemented secure authentication mechanisms using JWT, enhancing user access and data privacy.
- Leveraged Redis for caching to improve application performance and implemented cron jobs for task automation.
- Worked with AWS services for application deployment, resource optimization, and scalability.
- Maintained version control using Git and Bitbucket, ensuring smooth collaboration and efficient code management.
- Troubleshot and resolved technical issues, demonstrating strong debugging and problem-solving skills.
- Focused on delivering clean, maintainable, and reusable code to support long-term project scalability.

Education

B.Tech/B.E. - Computers

2021

MLR Institute of Technology, Hyderabad

Grade - 7.9/10
